SUMMARY

Full-Stack Developer and Founding Engineer with experience building scalable web applications. Currently leading technical operations at Oohpoint, India's first phygital micro-gig platform serving 2,400+ users. Specialized in React, Next.js, Node.js, and Firebase with a focus on rapid product development and measurable business impact

TECHNICAL SKILLS

Languages	: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend	: React.js, Next.js, Redux, Tailwind CSS, Bootstrap, GSAP, Framer Motion
Backend	: Node.js, Express.js, Firebase, MongoDB, PostgreSQL, REST APIs
Developer Tools	: Git, GitHub, VS Code, Postman, Figma, Vercel

EXPERIENCE

Oohpoint, Founding Engineer

[Oct 2025 - Present]

- Leading technical team and engineering operations for India's first phygital micro-gig performance marketing platform
- Architecting system improvements and optimizations to handle 2,400+ active users and ₹18L+ in transaction volume
- Managing end-to-end technical infrastructure including Firebase backend, Next.js frontend, and real-time data processing systems
- Driving technical decision-making for CPVE (Cost Per Verified Engagement) model implementation and geo-fenced campaign systems

Oohpoint, Junior Software Engineer

[Jan 2025 - Oct 2025]

- Developed backend API infrastructure with Firebase for real-time campaign management, user authentication, and payment processing
- Implemented frontend features including brand dashboard, user gig completion flows, and multi-portal authentication (Brand/User/Vendor/Agency)
- Engineered geo-fencing and OTP verification systems for fraud prevention and engagement validation
- Created responsive landing pages and marketing website (oohpoint.com) for QR advertising platform
- Optimized application performance for 84% average completion rate across micro-gig campaigns

Nestcraft Design, React Developer

[May 2025 - Jul 2025]

- Developed complete admin dashboard UI in React.js with role-based access control and data visualization components
- Built responsive company landing page with modern design patterns and seamless user experience
- Implemented reusable component libraries and state management solutions for scalable frontend architecture
- Collaborated with design team to translate Figma mockups into pixel-perfect, production-ready React components
- Delivered multiple client projects on tight deadlines while maintaining code quality and documentation standards

Floship Services, Freelance Web Developer

[Jan 2025 - Mar 2025]

- Delivered end-to-end web development for logistics company, managing full project lifecycle from client consultation to deployment
- Designed and developed responsive website using React.js, Tailwind CSS, and React Router with optimized performance
- Implemented custom contact forms, multi-section service pages, and mobile-first responsive layouts
- Translated business requirements into clean UI/UX with smooth navigation and cross-browser compatibility
- Live Project: <https://floshipservices.com>

EDUCATION

Bachelor of Engineering (BE) in Computer Science, Chhatrapati Shivaji Maharaj University, Panvel

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS

2023 – 2026
Maharashtra, India
